

STATE OF WASHINGTON
Washington State Department of Health
SOLE SOURCE NOTICE

The Washington State Department of Health (DOH) contemplates awarding a sole source contract to Care Coordination Systems LLC (CCS) to provide all the necessary personnel, equipment, goods and services and otherwise do all things necessary for or incidental to the performance of building a statewide Universal Developmental Screening (UDS) repository of child screening and referral data; to include annual maintenance and licensing for the five-year period of the contract.

CCS has unique capability and expertise to execute the build and implementation of the UDS data system. Primary among them:

- Has built Universal Developmental Screening registries for other states that meet the scope and needs of the DOH program and will only need to be modified to work with DOH systems.
- Has existing database interface that can be tailored to DOH needs but not require a build from scratch.
- Has existing applications built for the same user base that will access the UDS data system (healthcare providers and parents/guardians.)
- Has established access to all ASQ screening results through existing relationship with publisher and ability to build M-CHAT and SWYC into solution. (ASQ, M-CHAT and SWYC are identified for inclusion in UDS data system.)
- Has interoperable structure that is able to use the state's Health Information Exchange (HIE) system.
- Has ability to build and implement a fully operational system within the IAPD funding period ending September 30, 2021,

The contract will be issued on or about March 15, 2021 for 60 months with the option to extend the contract in whatever increments DOH deems necessary. The contract value is estimated at \$2.88 million.

Offerors contemplating the above requirements are required to submit capability statements detailing their ability to meet the state's requirements within 5 days of this announcement or March 4, 2021 by 5pm.

The following information should be included in the capability statements:

- Personnel, equipment and expertise to build a new statewide Universal Developmental Screening (UDS) data system that allows data collection and sharing, is able to accept both manually entered and imported data, support data file extracts and printed reports, incorporates interoperability with other DOH and external healthcare systems, supports validation of provider credentials, and complies with DOH and Washington state security and governance stipulations.

- Personnel, equipment and expertise to provide project management, test cases, training plan, end user training, deployment, system documentation.
- Ability to provide a fully functional UDS data system that meets all DOH requirements by the expected end date of September 30, 2021.

Interested firms will be considered only if they respond with clear and convincing documentation that they are capable of meeting the requirements stated herein, and that competition would be advantageous to the State, would not be cost or time prohibitive, and would not hinder the mission objective of the Department of Health. In the absence of other qualified sources, it is the state's intent to make a sole source award of the contract. DOH reserves the right to amend the contract in whatever increments it deems necessary.

Note: This contract is required to be filed with the Department of Enterprise Services (DES) for approval under the provisions of Chapter 39.26 RCW. No contract or amendment required to be so filed is effective and no work shall commence or be payment made until ten (10) working days following the date of filing, and, if required, until approved by DES. In the event DES fails to approve the contract or amendment, the contract shall be null and void.

To submit capability statements, request a copy of the proposed contract or for questions, contact:
